

TIGER CLASS

In English, Tiger Class have been busy researching information for a factual report. The children have identified the key points within the text and have made notes. They have then been writing their factual reports in a formal tone. Tigers have also worked hard to include a range of language features.

In Maths, Tiger Class have been learning about algebra. The children initially solved calculations involving one-step and two-step function machines. They have also learnt about expressions, substitution and formulae.

During the afternoons, Tigers have re capped on the Easter story, began their topic on Britain's Parliament system and started their topic in Science on Evolution and Inheritance.

Well done this week to Amalie and Lucas for earning certificates.

Don't forget, Homework Club on Monday after the holiday. Swimming will also be continuing on a Tuesday.

Have a lovely weekend.

Mrs Gittens and Ms. Archer
