

# TIGER CLASS

In English, Tiger Class have been extending their knowledge of biographies. They have identified not only how they are structured, but also the language features included within them. The children have used dictionaries to find out the meaning of unfamiliar words and have completed short burst writing activities based around formal language and concise sentences.

In Maths, the Tiger Class have been continuing to work on calculating angles. The children have been learning how to calculate these within quadrilaterals, before moving on to other 2D shapes. The children have ended the week recapping their knowledge of 3D shapes.

During the afternoons, Tiger class have continued to learn about Greece, locating it on a map and identifying its capital, surrounding seas and population.

In Science, they learnt about Invertebrates and in Art the pupils designed their Greek pots.

In PE, the children are continuing to develop their skills in rounders.

Well done for earning a certificate to: Tilly and Alexa

Have a super weekend. Weather is looking great!

Mrs Gittens and Ms.Archer
