Try this....

Phishing attacks attempt to trick unsuspecting users into revealing personal or financial information, often by mimicking content from well-known, trusted companies.

AI is making phishing attacks more sophisticated, personalized, and common.

Think you can tell what's real or fake?

Check out this great resource

A poster to empower the **LGBTQ+ community** to embrace themselves online in a way which best suits them. Whilst encouraging pupils to **express their identities** at whichever pace they feel, it also reminds them that there are **report and block tools for discriminatory behaviour**.
