

TIGER CLASS

At the beginning of the week, Tigers were completing maths activities linked to wages and annual salary. The children calculated gross pay from weekly or monthly payments and deducted 20% tax to find out the nett pay.

In Science, the children have been learning about the effect drugs can have on the human body.

Rehearsals for our end of year production have been continuing this week and several children now know their lines which is fantastic. Tigers are thoroughly enjoying practising this.

The children have been amazing this week bearing in mind the extreme temperatures and have coped really well. Well done!

Well done this week for earning a certificate to: Reece

Have a great weekend!

Mrs Gittens and Ms. Archer
