Friday 18th September

Maths

This week in Maths, we have been developing our understanding of numbers up to 1,000,000. We have explored finding 10, 100, 1,000, 10,000 and 100,000 more or less than a number, partitioning numbers to 1,000,000 and using number lines. We have also been comparing and ordering numbers.

English

In English, we have been continuing our work on warning tales. We have explored expanded noun phrases and used our senses to develop descriptions, using fronted adverbials to add detail to our writing. We have also been learning how to punctuate speech correctly. To help us remember the rules, we learnt a song with actions! We have now boxed up our warning tale and planned our own stories, ready to begin writing them.

Science

In Science, we have been learning about the Solar System and the movement of the planets. We went outside and acted out the planets orbiting the Sun, with different children taking on the role of each planet. We learnt that the Sun is our star and sits at the centre of our Solar System. We also discovered that planets closer to the Sun take less time to orbit, while planets further away take longer.

Topic

This week, we have been learning about the water cycle. We acted out the different stages of the water cycle to help us understand the process before creating our own labelled diagrams.

Art

In Art, we have been learning about the artist Claude Monet and the Impressionist style. We went outside and used charcoal to sketch things we could see in nature, thinking about how artists such as Monet observed and captured the world around them.

Well done to Willis and Leila for getting a certificate this week!

Have a great weekend!
