

Leopard Class Newsletter

In English we have had lots of fun writing fireworks poems using our senses and creating beautiful fireworks pictures to go with the poems.

In Maths, we have continued learning about part-whole models and we can now use the numbers in the part-whole model to write number sentences using a + sign and an = sign. We have completed our learning on length and height this week. The children are now confident at measuring the length and height of objects using cubes and in centimetres using a ruler! Well done, Leopards.

We have started our new topic 'Poles Apart' this week. The children really enjoyed meeting Chilly the penguin, who has travelled from The South Pole to help us with our topic. After watching the live web cams from Edinburgh zoo of the Penguin enclosure, they designed a brilliant habitat for Chilly to live in.

If you would like to keep an eye of the penguins at Edinburgh Zoo, click on the link below!

In our Science lesson this week, the children have really enjoyed finding objects made out of more than one material. We have also been learning about different fabrics and how they are made.

Homework

Please continue to try and read 3x a week at home and practise the spellings which are sent home on a Monday!

Stars of the Week

Well done to Carter and Mason for a great first week in Leopard Class.

Have a lovely weekend!

Miss Dallow and Mrs Wright 😊
