

Bright Bumblebees

Maths

This week, we have been using number lines to support us when adding two numbers together. We know that addition can be done in any order and that it's easier to count on from the biggest number.

Our number bonds to ten have also helped us to add 3 small numbers together. Eg, $7+5+3=$

English

We have planned how to make our own vegetable soup. We then carefully wrote instructions using time connectives, adjectives and adverbs for making our very own soup.

Topic

This week we have learnt about George Cadbury, another pioneer of industry. He was famous for developing the Cadbury site at Bournville, including homes and leisure activities for his employees. We were surprised to find a letter from Willy Wonka in our classroom. He has challenged us to design and make our own chocolate bar! Watch this space!

This week's Bright Bumblebees are **Freddy** and **Olivia**!

Have a great weekend and see you on Monday!

Mrs Hickman 😊
