Friday 12th September

Maths

In Maths this week, we have been learning about the place value of numbers to 1000. We have been identifying hundreds, tens and ones and looking at different ways that numbers can be partitioned. We have been playing a game at the end of each lesson to support us with this:

<https://mathsframe.co.uk/en/resources/resource/554/Dienes-Identify-and-Represent-Numbers>

English

In English this week, we had a special delivery, which meant that our original planned lesson had to be cancelled! A treasure chest arrived from some pirates that were looking for some beach setting description writing! The rest of the week has been spent creating descriptive word banks and learning a setting description off by heart ahead of writing our own in the next few weeks.

Science

In Science, we have been looking at the nutrients that food provides us with. This links closely with our new D.T unit – making a healthy snack for an explorer. Today we have been tasting different sandwiches and thinking about what nutrients they provide us with.

Topic

In topic, we have been locating hot and cold areas of the world in an atlas and have started labelling them on a map.

Homework

Please try to read at least 3 times a week at home and record in reading records, practice spellings each evening and complete 15 minutes of TTRS each week. This will be checked every Friday.

Well done to Winnie, Archie T, Poppy and Advit for achieving certificates this week!

Have a lovely weekend,

Miss Higgins
