Friday 5th December

Maths

In maths this week, we have been multiplying and dividing by 8. We have been using sharing and grouping to help us to solve division problems.

This term, we are focusing on practicing our 2s, 5s and 10s times tables. Now that we have looked at our 3s, 4s, and 8s in class, after Christmas these will be our focus. We have been playing fun multiplayer games, such as tug of war and tables tennis (see links below) to help strengthen our times table knowledge.

English

In English this week, we have been researching polar animals for our non-chronological reports next week. We have also made a 'toolkit' to help us remember which features we need to include in our non-fiction writing and have planned our reports.

History

This week, we learnt about Stonehenge and why it was such a significant monument. Impressively, we were able to make links to our science unit on rocks and understood why the rocks had broken down so much over time due to weathering and erosion. Also, we learnt about the changes between the Stone Age and the Bronze Age and were able to identify why life improved during this period.

Science

In Science this week, we became fossil detectives! We had a go at working out what each fossil might have been, and learnt how fossils are formed.

Homework

Please try to read at least 4 times a week at home and record in reading records, practice spellings each evening and complete 15 minutes of TTRS each week. This will be checked every Friday.

Well done to Ava, Teddy, Oscar and Archie M for achieving certificates this week!

Have a lovely weekend,

Miss Higgins
