Maths

This week in maths, we have been revising all our key units from the term, including place value, addition and subtraction, multiplication and division, and fractions. The children have been practising a range of skills to help them feel confident and prepared for their end-of-term assessments next week.

English

In English, we improved our cold task by rewriting our non-chronological river reports. The children researched more information, planned their writing carefully and used our toolkit to include key features such as subheadings, technical vocabulary and parentheses. The quality of their improved reports has been fantastic.

PE

In PE, we continued developing our orienteering skills, working in partners to follow maps accurately and efficiently. We also continued our circuit training, trying a variety of different exercises and focusing on improving our form, stamina and the number of repetitions completed within the time limits.

Computing

In computing, we continued exploring vector drawings. The children have been using colours, different shapes and line tools to make their creations more detailed and creative. They are becoming much more confident with layering, resizing and combining shapes.

Well done to Rori, Zak and Crue for achieving certificates this week!

Have a lovely weekend!
